Explanation of Responses:

1. Each Performance Share Unit (PSU) represents a contingent right to receive 1 share of the Company's common stock. The PSUs may be earned over a 3-year period from FY 2020 through FY 2022, depending on the achievement of certain metrics. The number of PSUs awarded is a function of base pay, a PSU LTI percentage and the fair value of a PSU. The fair value of a PSU is calculated as the stock price as of the effective date less the present value of Company stock dividends over the vesting period. This calculation requires the input of certain assumptions, including the risk-free interest rate and the expected Company stock dividends. The formula for determining the number of PSUs granted is: number of PSUs=(base pay x PSU LTI%) / PSU fair value. The percentage of PSUs granted that will actually be earned at the end of the 3-year period is based upon the Company's free cash flow, earnings before interest and tax (EBIT) margin percent, and market share results over that same period.

2. The actual expiration date of the award may be earlier depending on results during the performance cycle.

3. The number of options granted is not known at this time. The number is calculated as a function of certain assumptions, including risk-free interest rate, volatility, dividend yield, and expected life. The formula for

determining the number of options granted is: number of options = (base pay x option LTI%)/option fair value. This Form 4 will be amended to report the number of options granted when that number has been calculated.

4. Granted under the issuer's 2019 Equity Incentive Plan, exercisable in four equal annual installments, beginning on 3/10/2021.
