Explanation of Responses:

- Restricted Stock Unit vesting in four equal annual installments commencing on 3/10/2020. The number of RSUs to be awarded is a function of base pay, a long-term incentive (LTI) percentage and the fair value of an RSU. The fair value of an RSU is calculated as the stock price as of the effective date less the present value of Company stock dividends over the vesting period. This calculation requires the input of certain assumptions, including the risk-free interest rate and the expected Company stock dividends. The formula for determining the number of RSUs granted is: number of RSUs = (base pay x LTI%) / RSU fair value.
- Directly owned shares total updated to correct prior clerical error resulting in omission of 3,623 shares.
- Each Performance Share Unit (PSU) represents a contingent right to receive 1 share of the Company's common stock. The PSUs may be earned over a 3-year period from FY 2020 through FY 2022, depending on the achievement of certain metrics. The number of PSUs awarded is a function of base pay, a PSU LTI percentage and the fair value of a PSU. The fair value of a PSU is calculated as the stock price as of the effective date less the present value of Company stock dividends over the vesting period. This calculation requires the input of certain assumptions, including the risk-free interest rate and the expected Company stock dividends. The formula for determining the number of PSUs granted is: number of PSUs=(base pay x PSU LTI%) / PSU fair value. The percentage of PSUs granted that will actually be earned at the end of the 3-year period is based upon the Company's free cash flow, earnings before interest and tax (EBIT) margin percent, and market share results over that same period.
- The actual expiration date of the award may be earlier depending on results during the performance cycle.
